

Online Security Tips

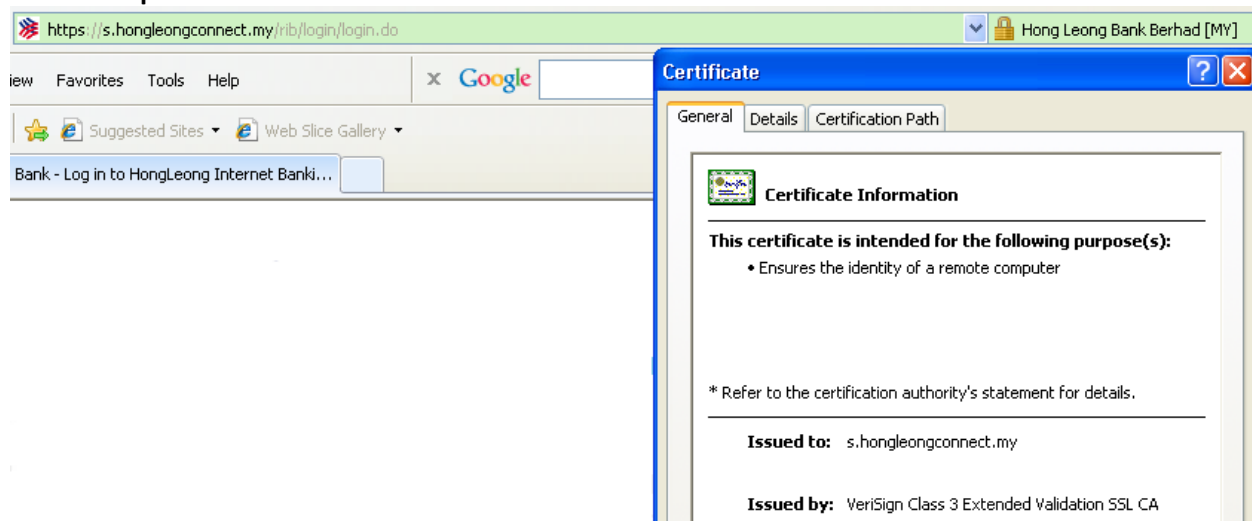

SPECIFICALLY FOR HONG LEONG CONNECT USERS

1. **ALWAYS MANUALLY ENTER** www.hongleongconnect.my into your internet browser.
2. **CONFIRM THE AUTHENTICITY** of the login page by observing that the address bar shows <https://s.hongleongconnect.my/rib/login/login.do> and that there is a padlock icon next to it.

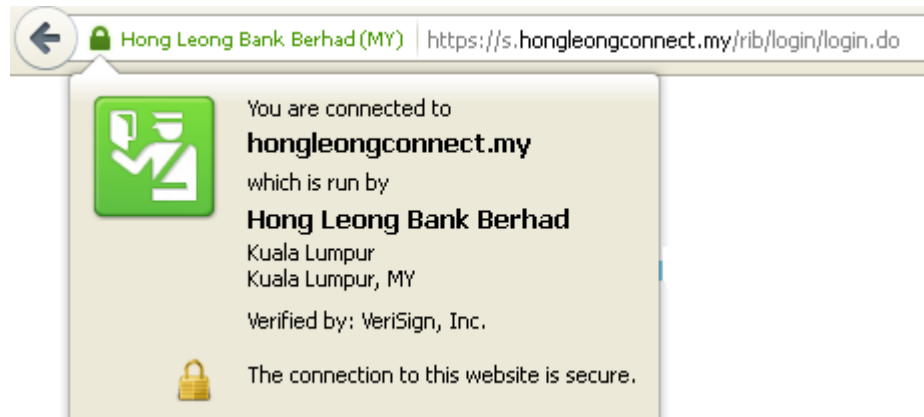

Click on the padlock and check that the web certificate is issued to s.hongleongconnect.my before proceeding to log in.

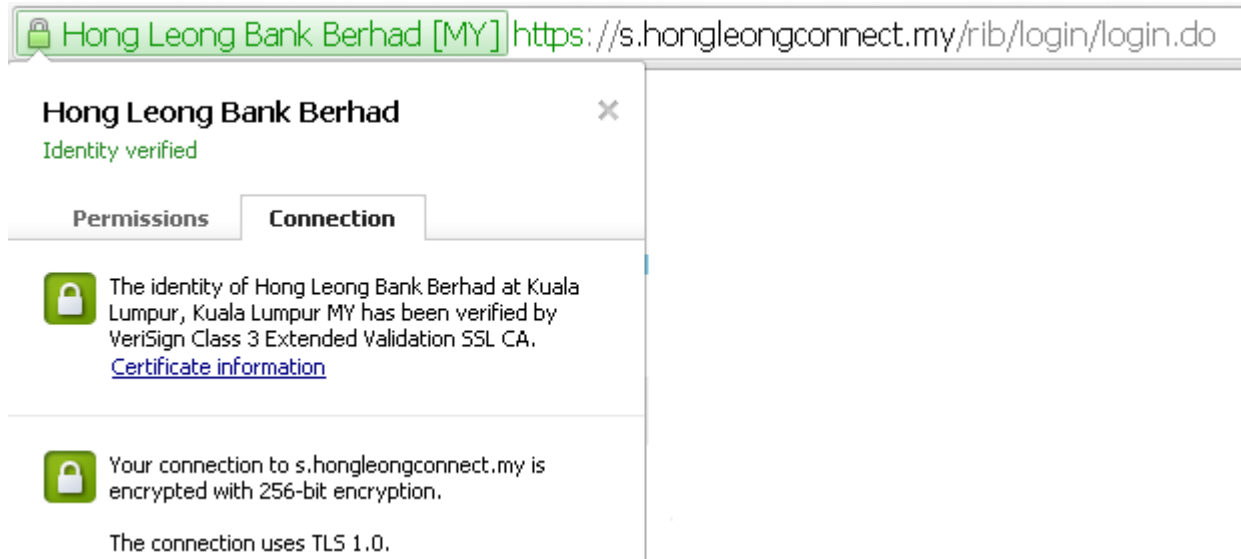

Internet Explorer

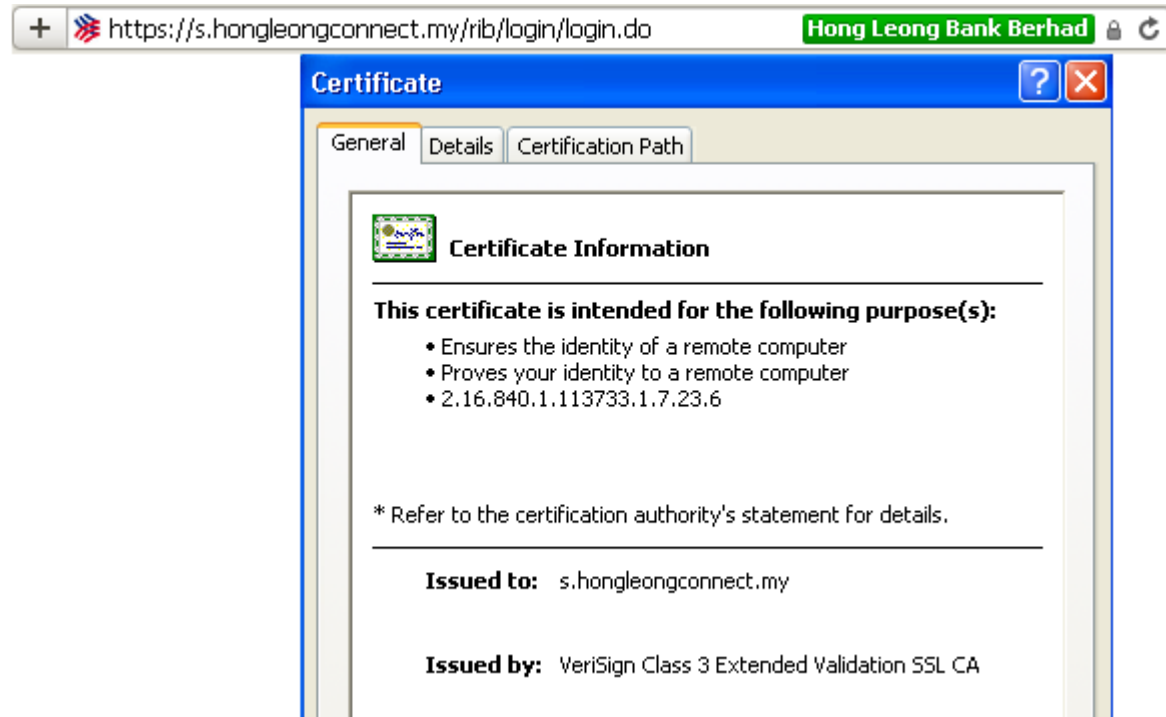

Mozilla Firefox

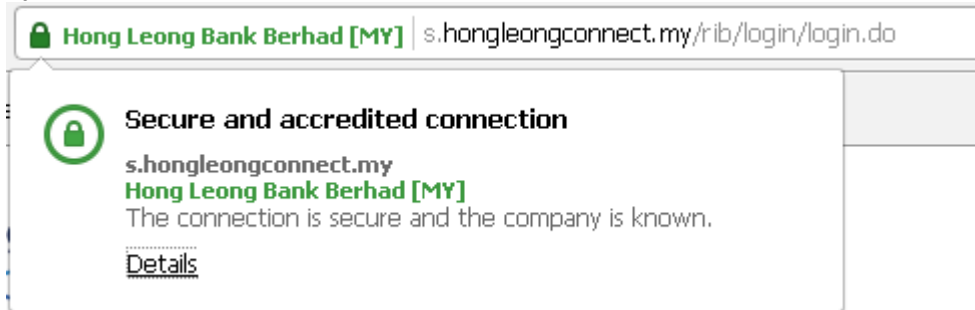

Chrome

Safari

Opera

3. **ENSURE YOUR CORRECT SECURITY PICTURE APPEARS** before entering your password.

A screenshot of the "SECURED LOGIN" page. At the top, there is a dark blue header with a white lock icon and the text "SECURED LOGIN". Below the header, there is a square image of a green grasshopper on a leaf. Underneath the image, the text reads: "Please do not enter your password if this picture is different from the one you have selected during registration." Below this text, there are two input fields: "Username" with the value "ADASD" and "Password" with an empty light blue box. To the right of the password field is a blue link "Reset HLB Connect" with an information icon. At the bottom, there are two buttons: a dark blue "Back" button and a green "Submit" button.
