Hong Leong CM Flexi Term Financing-i (CMFTF-i)

June 2018

1. What is this product about?

- CMFTF-i is a non-revolving Shariah compliant financing facility that has a predetermined maturity date and payment schedule.
- It is generally used for financing the purchase of fixed assets such as properties or machineries and sometimes for working capital.
- CMFTF-i comes with a variable (floating) rate and is pegged to Islamic Financing Rate (IFR) or Islamic Effective Cost of Fund (ICOF). Under this product, you are protected against a higher rate by the ceiling rate i.e. the Contracted Profit Rate (CPR) where selling price is capped at CPR. No matter how high the IFR or ICOF fluctuates, you will not be charged more than the CPR.

2. What is the Shariah concept applicable?

The Shariah principle used is Murabahah via *Tawarruq* arrangement. *Tawarruq* refers to purchasing an asset with deferred price, then selling it to a third party to obtain cash.

The mechanics involved in CMFTF-i:

1. Bank buys the commodity* (same value as financing amount) from a commodity supplier on spot as principal (Bank now owns commodity);
2. Customer appoints the Bank as an agent to purchase the commodity and also appoints the Bank as an agent to sell the commodity.
3. Bank sells the commodity to Customer at cost plus mark-up (same value as selling price) on deferred payment (instalments). Upon the purchase, the Customer now owns the commodity.
4. As owner of the commodity, Customer may opt to:
 - (a) take physical delivery/possession at his own expense; or
 - (b) sell the commodity to a third party for cash;
5. If the customer chooses (b), Bank (as agent of the Customer) sells Customer's commodity (same value as financing amount) to third party on spot for cash;
6. Bank disburses the sale proceeds (financing amount) to Customer.

* *Commodity:*

- (a) *The commodity is in the form of Crude Palm Oil or any other Shariah compliant commodities to be traded under the Facility shall be acceptable to the parties and as approved by the Shariah Committee of the Bank;*
- (b) *The trading is carried out on a multi-commodity trading platform such as Bursa Suq Al Sila' or any other commodity trading platform, which facilitates Tawarruq transactions and has been approved by the Shariah Committee of the Bank.*

3. What do I get from this product?

- Margin of Financing (MOF) offered will depend on the purpose of financing. Typically, for property financing the MOF is up to 80%
- Commodity Sale Price will be calculated based on CPR. Typically, CPR is based on 6% above prevailing IFR.
- Profit charges will be calculated based on Effective Profit Rate (EPR)*. EPR charges will depend on the purpose of financing and is pegged to IFR or ICOF. Generally, for property financing rates ranges from IFR - 1.8% to IFR + 1.0% p.a. while for working capital rates are at IFR + 0.5% to IFR + 3.0% p.a.
- Financing tenure differs with the purpose of financing. Generally ranges from 5 years to 15 years

* *If the profit amount based on EPR is lower than the profit amount based on CPR, rebate will be granted on the difference upon receipt full settlement by the Bank.*
